

GnuCOBOL Tui Tools Collection: 74 "HELP SYSTEM"

Edit a source TXT file with HELP informations. Example GC74HELPPFILE.TXT.

Execute GC74HELPOAD:EXE that read GC74HELPPFILE.TXT and create GC74HELPPFILE.DAT ad indexed file.

Execute GC74HELPLIST:EXE to browse on file GC74HELPPFILE.DAT to verify its content.

Develop your application in which "call HELPVIEW.dll using Help.Area" that display a window with scrolling help message on screen.

Files:

GC74HELPPFILE.TXT = text help source file edited by the user

GC74HELPOAD.COB = read a text file and create the indexed file

GC74HELPPFILE.DAT = indexed file created by GC74HELPOAD.exe

GC74HELPLIST.COB = browse an indexed file example browse GC74HELPPFILE.DAT

GC74HELPPVIEW.COB = .dll program. call it from your program to display the help window

GC74HELPPVIEW.CPY = use this copy to pass parameters to GC74HELPPVIEW.dll

See next TUI TOOLS contribution (a CRUDE application) to see this tool GC74HELPPVIEW at work.

If you hit F1 Help you get a scrolling help message on that field

C:\OpenCobolIDE\pyqode-console.EXE

C.R.U.D.E. APPLICATION (File: ANAGEALI.DAT)

Operation: CREATE
